

Category Performance & Merchandising Analysis Dashboard

Executive overview of category performance, inventory efficiency, pricing competitiveness, and promotion effectiveness.

Executive Summary

- Furniture generated the highest average revenue, indicating strong category performance.
- Electronics maintained the highest inventory coverage ratio (6.0), suggesting potential overstock risk relative to demand.
- Revenue declined as discount levels increased, indicating promotional activity did not significantly improve sales performance.
- Competitor benchmarking showed category pricing remained within $\pm 4\%$ of market averages, supporting a competitive pricing strategy.
