Rank is
unpredictable.

Challenges

- Dropped a predictor → ended up being unreliable
- Virality is very unpredictable!
- Several other variables that actually matter for the rank according to Youtube- ex: watch time and audience retention- variables not included in this dataset.

Future Considerations

- Other Features to Observe
 - Using subscriber count as a predictor
 - Appearance of the thumbnail
 - How many times the video is clicked
 - Audience watch time
- Research on Rank Factors
- Other Model Strategies
